

## **Jillian Pruner**

**CSOM '21**

Jillian Pruner graduated from the Carroll School of Management in 2021 with a bachelor's in Operations and Managing for Social Impact and the Public Good.

Jillian stayed active and engaged while on campus. She became an executive board member of Ecopledge, a student-led organization dedicated to creating a more sustainable and environmentally friendly campus, and started an internship at the Boston College Office of Sustainability. She is passionate about establishing “stronger administrative championship” and partnering with like-minded groups in order to enact real environmental change and sustainable campus initiatives.

Jillian's desire to create a more green BC campus was on display in the Office of Sustainability by working with environmental stakeholders to organize events, represented the office at various meetings on campus, participated in environmental events, and attended actions supporting environmental causes. Everyone in Facilities Services is thankful for her service, activism, and wishes her well.
